Massenburg DesignWorks Hi-Res EQ 1.0

Thank you for purchasing the Massenburg DesignWorks Hi-Res EQ™ (MDW EQ) plug-in for Pro Tools|HD. This Read Me documents installation information for MDW EQ. Please read it before installing the plug-in.

MDW EQ Installer

The MDW EQ 1.0 Installer CD will install either the Mac OS X or Mac OS 9 version of the MDW EQ plug-in, depending on which Mac OS version you are currently using.

MDW EQ Plug-In Guide

The *MDW EQ Plug-In Guide* is provided as an Adobe Acrobat™ PDF file on the MDW EQ 1.0 Installer CD. It provides information on the features, capabilities, and usage of the MDW EQ plug-in.

Authorizing the MDW EQ Plug-In

The MDW EQ plug-in must be authorized using the iLok USB key with an iLok License Card from PACE Anti Piracy. One iLok USB key is included with your Pro Tools|HD Core system. This key can hold over 100 authorizations for all of your iLok-enabled software. An iLok License Card for MDW EQ is provided with the MDW EQ plug-in.

iLok with License Card

To authorize the MDW EQ plug-in with the iLok License Card:

- 1 Insert the iLok USB key into an available USB port on your computer.
- 2 Launch Pro Tools.
- 3 When prompted for authorization, follow the on-screen instructions until you are asked to insert the License Card into the iLok.
- 4 Separate the License Card from the larger protective card by pulling the cutout up and out with your thumb. Do not force your finger downward.
- 5 Insert the License Card into the iLok. Visually verify that the License Card makes contact with the iLok's metal card reader.
- 6 With the iLok inserted in any available USB port on your computer, click Authorize.
- 7 Remove the License Card after authorizing. If you have to remove the iLok to remove the License Card, be sure to re-insert the iLok in any available USB port on your computer.
- 8 Follow the on-screen instructions to complete the authorization process.
